No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1984 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Cumulative Subject Index for Volumes 24–25 376

INFORMATION FOR AUTHORS

The *Journal of Vocational Behavior* publishes empirical, methodological, and theoretical articles related to such issues as the validation of theoretical constructs, developments in instrumentation, program comparisons, and research methodology as related to vocational development, preference, choice and selection, implementation, satisfaction, and effectiveness throughout the life-span and across cultural, national, sex, and other demographic boundaries. Literature reviews and descriptions of program applications will be published on occasion. Brief notes of a methodological, instrumentation, or replication nature will also be considered for publication. Because of limitations in available journal space, authors are encouraged to integrate two or more short papers based on a series of related studies into one longer manuscript rather than to submit the shorter manuscripts separately.

Manuscripts will be reviewed by the Editor-Elect, Nancy E. Betz. Manuscripts should be submitted in quadruplicate to:

Journal of Vocational Behavior
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Vocational Behavior* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be prepared on high quality bond paper with wide margins using double spacing throughout. Four copies should be submitted; each copy should include all tables and figures. Each page of the manuscript should be numbered. The first page should contain the article title, author's name, affiliation, and address to which correspondence should be sent. Authors should *not* place their name on the manuscript itself. The second page should contain an abstract 100 to 150 words in length.

Authors are requested to follow the instructions given by the third (1983) edition of the *Publication Manual* of the American Psychological Association. Certain modifications are listed below.

Abbreviations and Symbols. Do not underline symbols in text or formulas, for they will be routinely set in italics. Unusual symbols should be identified in pencil in the margin the first time they appear.

Figures and Tables. All illustrations are to be considered as figures, and each graph or drawing should be numbered in sequence with Arabic numerals. Each figure should have a descriptive legend and these should be listed on a separate sheet. Figures should be planned to fit the proportion of the printed page ($4\frac{1}{2} \times 6\frac{3}{4}$ inches), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50 to 60 percent. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text and placed at the end of the manuscript. All tables should have descriptive headings, typed (double-spaced) above the table. Footnotes to tables should be identified by superscript letters and placed at the bottom of the page containing the table. See also the American Psychological Association *Publication Manual* sections 3.59 to 3.82.

Footnotes. Footnotes to the body of the article should not be used. The material they would contain should be included in the text.

References. Literature references in the text should be cited by author's surname and the year of publication, e.g., Roe (1980); Roe et al. (1981); Roe and Jones (1983, p. 150) (for references to a specific page). If a reference has more than two authors, the citation includes the surnames of all authors at the first mention, but later citations of the same reference include only the surname of the first author and the abbreviation "et al." Suffixes *a, b,* etc. should be used following the date to distinguish two or more works by the same author(s) in the same year, e.g., (Roe, 1983a, 1983b). Literature citations in the bibliography should be arranged alphabetically according to the surname of the author. Journal titles should be written out in full rather than abbreviated. As of the third edition of the American Psychological Association *Publication Manual*, reference notes have been eliminated. All references except Personal Communications (which are mentioned *only* in the text) should be in the reference list and should be prepared based on *Manual* sections 3.86 to 3.101. The correct style of capitalization and punctuation for journal articles, books, and edited books is illustrated in the following examples:

Super, D. E. (1980). A life-span, life-space approach to career development. *Journal of Vocational Behavior,* **16,** 282–298.

Atkinson, J. W., Lens, W., & O'Malley, P. M. (1976). Motivation and ability: Interactive psychological determinants of intellective performance, educational achievement, and each other. In W. H. Sewell, R. M. Hauser, & D. L. Featherman (Eds.), *Schooling and achievement in American society* (pp. 29–60). New York: Academic Press.

Nesselroade, J. R., & Baltes, P. B. (1979). *Longitudinal research in the study of behavior and development*. New York: Academic Press.

Proofs and Reprints. Proofs will be sent to the author, with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of composition. Fifty reprints of each article will be provided free of charge.
